Anesthesia Supply Management Solutions

Solutions to Help You With Your Anesthesia Supply Management Challenges *Medline's Anesthesia Complete Delivery System (ACDS)* will ...*

- ✓ Increase staff productivity and satisfaction
- ✓ Improve inventory control
- ✓ Increase space utilization
- ✓ Improve charge/cost capture
- ✓ Eliminate outdated product
- ✓ Enhance supply standardization
- ✓ Enhance compliance with JCAHO, AORN and SCIP

***Deliver the right anesthesia supplies,
at the right time, at the right cost.***

* Patent pending

What Is ACDS?

Medline's Anesthesia Complete Delivery System (ACDS) is a unique supply management program that helps customers solve many of their anesthesia supply management challenges. ACDS assists medical facilities in refilling the components in their anesthesia case carts at the clinical point of use versus ordering components in case quantity and stocking multiple locations.

Designed Just for You

Each ACDS program is custom designed based on your facility's anesthesia supply requirements, resulting in a more efficient and cost-effective system. ACDS will reduce supply handling touch points, which will improve staff productivity. It will also reduce the chance of product cross contamination, reduce inventory, and reinforce product safety compliance standards while standardizing high volume anesthesia supply utilization. ACDS replenishment drawers will fit into your existing anesthesia case carts.

Before

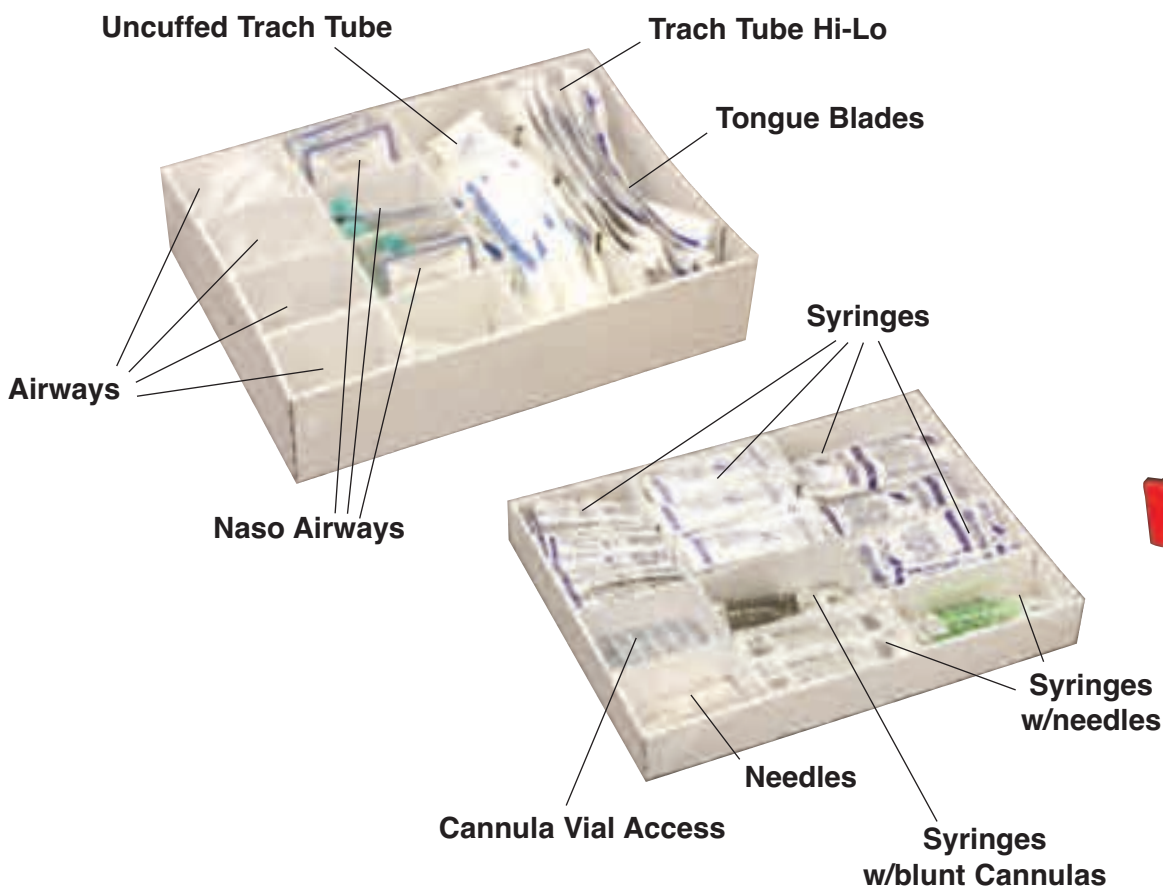

A Medline account prior to the use of ACDS

After

A Medline account utilizing ACDS

ACDS Can Simplify Your Supply Chain by Dramatically Reducing Your Anesthesia Supply Handling “Touch Points”

Benefits of a Comprehensive ACDS Program

Medline is committed to providing creative and continuous solutions that benefit the clinical, logistical and financial aspects of your anesthesia supply management. Our dedicated team of specialists work with you to develop a comprehensive analysis and plan for implementation.

Clinical

- Standardize drawers across your facility or system
- Free-up staff time for clinical support duties such as medication labeling
- Eliminate excess and expired product inside each drawer
- Meet and exceed all standards for AORN, Joint Commission and SCIP

Logistical

- Reduce inventory levels by 50 to 60 percent
- Drastically reduce touch points and purchase orders
- Improved space utilization with anesthesia work room redesign
- Disaster preparedness/Mobile exchange rack

Financial

- Costs per procedure more easily identified
- Consignment
- Preferred component program for added cost savings
- Decrease freight costs

Medline's ACDS team:

- A local sales representative will perform weekly visits to your facility
- Regional Vice Presidents—project managers averaging 22 years in O.R. supply management
- Logistics Specialists—skilled professionals with 16 years of hospital supply management experience
- ACDS Clinical Specialist

ACDS: Logistics

Taking Care of Your Needs Every Step of the Way

Once we determine how ACDS can benefit your facility, our logistics team develops a plan for efficient storage layout. Our innovative solutions can remedy your storage issues. We offer complimentary design services that include:

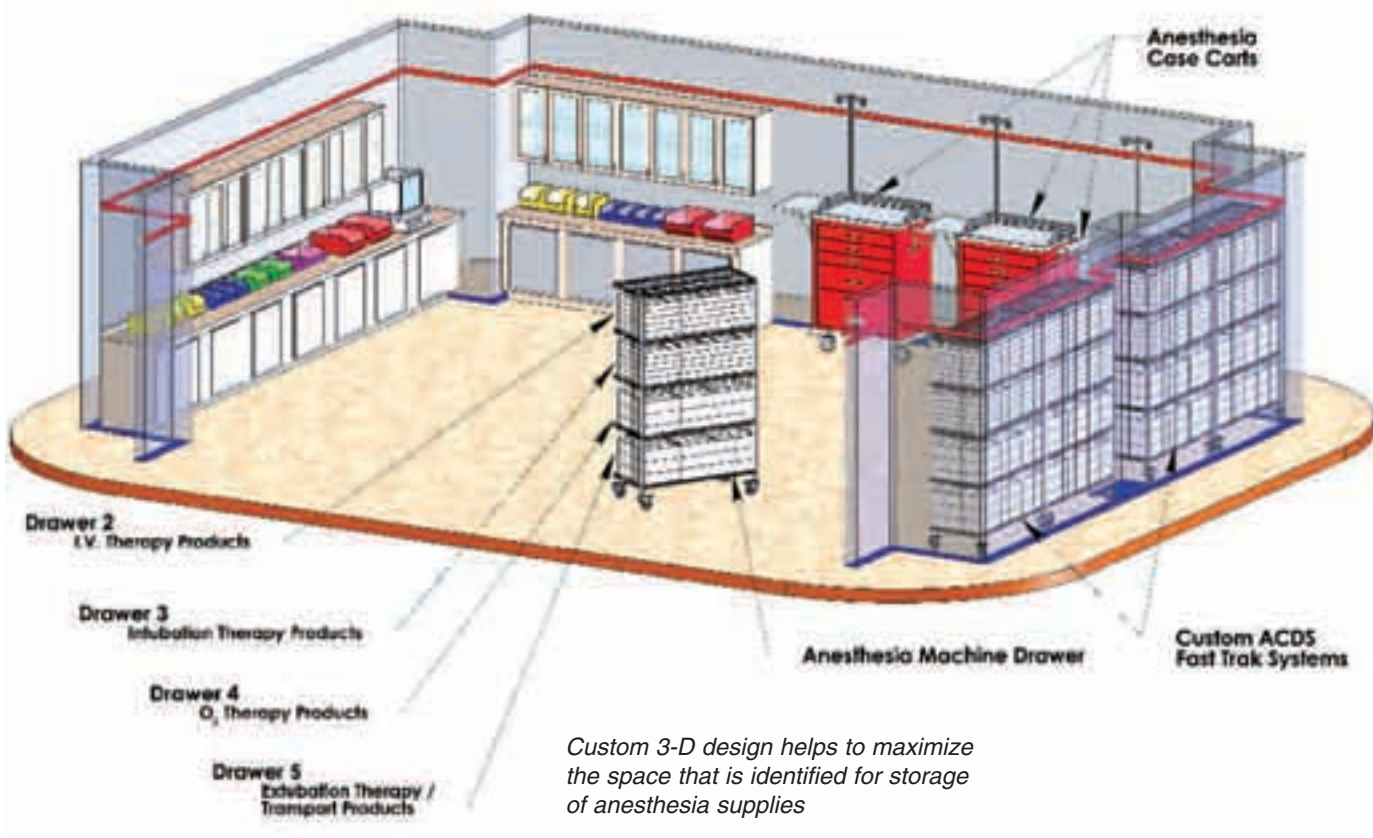

- Analyzing your facility's anesthesia supply chain process
- Anesthesia work room redesign
- 3-D storage area layout and design
- Design implementation
- Storage systems and accessories

A typical anesthesia work room prior to the utilization of Medline's design and logistical services

A Medline ACDS Fast Trak system offering over 80% supply compression

Custom 3-D design helps to maximize the space that is identified for storage of anesthesia supplies

Quality

Quality is key in any business. But in health care, when people's lives depend on the performance of our products, quality is everything. That is why everything we do starts and ends with our customer. We stand behind each and every one of our products and guarantee they will perform without complication. Our controlled rooms maintain a level of hygiene that is far stricter than required. Sterility and cleanliness are essential. To ensure that foreign particles do not contaminate our products prior to sterilization, our clean rooms are fitted with the latest in air filters and pressurization equipment.

FPO

Why Medline

Commitment to Quality — Highest Quality Standards

- ISO 9000/ISO 13485
(*Medical Device Manufacturer*) compliant
- Class 10,000 clean room

Service

- 99 percent service levels
- No unauthorized product substitutions
- MedPack — Web-based inventory position, Bill of Materials (BOMs), standardization, etc

Clinical Specialist Support

- Specialists average 20-plus years in O.R. experience
- Standardization and utilization analysis
- Kit review — current and new
- Implementation support

Local Sales, Sales Management and Kit Specialist Support

- Weekly visits
- Kit review and analysis/changes
- Dedicated customer service representatives

ACDS Component Return Policy

- Items in their original packages that are not damaged or soiled, can be returned for credit

QPlus Program

- Cost savings solutions
- High-quality Components
- QPlus components undergo an intense evaluation process to make sure they excel in performance, clinical acceptance and service

Logistical Support

- Space utilization analysis and design
 - supplies and instrumentation
- Logistical analysis
- Storage systems and accessories
- Case cart analysis and review
- Implementation support
- Inventory consignment programs

Commitment to Continuing Education

- Medline University
 - Online CE credit programs
 - www.medlineuniversity.com
- *The OR Connection*
 - Medline's magazine for perioperative services

Manufacturing/Distribution

- Regionally located manufacturing facilities
- Regionally located distribution facilities
- Contract distribution partners
- Regional and national disaster plan and support capabilities

Medline Partners With Organizations Committed to Improving Patient Care

- The Institute for Healthcare Improvement's (IHI) 5 Million Lives Campaign
- The Joint Commission's National Patient Safety Goals
- The American Hospital Association's (AHA) Surgical Care Improvement Project (SCIP)
