BioCon® 700
Ultrasonic Bladder Scanner

For Non-Invasive Measurements of Bladder Volume and Post-Void Residual (PVR) Urine Volume
Easy-to-Use, Portable and Reliable

The measurements and 3-D images from the BioCon 700 can be used through the continuum of care.

• Monitor urinary retention postoperatively and help reduce unnecessary catheterizations
• Screen for many common urological conditions
• Perform PVR testing of individuals at-risk for incomplete bladder emptying
• Use as an effective tool for developing continence-management protocols

Easy to use
The simplified, straight-forward functionality of the BioCon 700 can help you increase compliance, reduce staff training time and improve the transfer of knowledge, for better overall efficiency. With the BioCon 700, a bladder can be scanned in just four easy steps:

1. Select gender
2. Select scan to prescan
3. Locate the bladder
4. Select “scan”

Real-time pre-scan – increase accuracy and save time by viewing the bladder before the test is performed.

Full-color LCD touch screen with on-screen keyboard – as easy as using a smart phone.

Built-in thermal printer – documentation is a snap!

Convenient voice recording capability – improve communication by recording notes about a patient.

Optional mobile stand.

Exclusively distributed by Medline
Portable
The BioCon 700 can easily be secured to optional stand or used as a handheld. It has an attached handle and a small footprint, and it weighs only 2-lbs. (0.92 kg).

Reliable
The hand-held probe is encapsulated for extra protection. We stand behind the BioCon 700 with standard and extended warranties – ask your Medline representative for details.

For periodic calibrations, you can send the BioCon 700 to us, or you can purchase our Calibration Kit (see Accessories box).

Accessories
Mobile Stand
- Quiet-rolling wheels
- Locking casters

Calibration Kit
- Calibrate any BioCon 700 scanner onsite, as frequently as needed
- Only one calibration kit is needed, even for multiple scanners
- No internet connection is required, and there is no annual fee

Phantom Bladder
- Fully calibrated tissue-equivalent phantom
- For training or to identify the need for calibration

Ultrasound Gel
- For creating the conditions necessary for accurate imaging

Thermal Paper
- Replacement paper for the built-in printer

With the BioCon 700, you have an effective, easy-to-use tool for use throughout your facility. Ask your Medline Representative about the BioCon 700 Bladder Scanner today!
Improve Outcomes with Our Comprehensive Strategies

**ERASE CAUTI**
The ERASE CAUTI program includes an innovative closed-system Foley catheter tray, a variety of educational materials and program management to help stop catheter-associated urinary tract infections.

**Continence Management**
Through products and education, our Continence Management Program helps improve your quality of care and compliance with CMS guidelines, as well as the confidence and dignity of residents.

For more information about our evidence-based programs, contact your Medline Representative.
