Target Organs
- Central Nervous System
- Skin
- Eye
- Liver
- Respiratory System

Health Effects - Eyes
Liquid, mist or vapor will cause conjunctival irritation and possibly corneal damage.

Health Effects - Skin
Repeated or prolonged contact may produce defatting of the skin leading to irritation and dermatitis. Liquid may be absorbed through the skin but not in toxicologically significant amounts, unless the area of contact is large and exposure prolonged.

Health Effects - Ingestion
Swallowing may have the following effects:
- irritation of mouth, throat and digestive tract
- central nervous system depression
A large dose may have the following effects:
- dizziness
- drowsiness
- headache
- mental confusion
- nerve damage leading to numbness and muscle weakness
- fall of blood pressure
- liver damage
- lung damage

Health Effects - Inhalation
Exposure to vapor may have the following effects:
- irritation of nose, throat and respiratory tract
- central nervous system depression
Exposure to vapor at high concentrations may have the following effects:
- dizziness
- drowsiness
- headache
- mental confusion
- lung damage
- fall of blood pressure
- liver damage
- nerve damage leading to numbness and muscle weakness
4. FIRST AID MEASURES

Eyes:
Immediately flood the eye with plenty of water for at least 15 minutes, holding the eye open. Obtain medical attention if soreness or redness persists.

Skin
Immediately flood the skin with large quantities of water, preferably under a shower. Remove contaminated clothing and continue washing. Contaminated clothing should be washed or dry-cleaned before re-use. Obtain medical attention if blistering occurs or redness persists.

Ingestion
Do not induce vomiting. Have victim drink 1-3 glasses of water to dilute stomach contents. If there is difficulty in breathing, give oxygen. Obtain medical attention immediately.

Inhalation
Remove from exposure. If there is difficulty in breathing, give oxygen. Obtain medical attention immediately.

Advice to Physicians
Monitor for systemic secondary effects on liver and kidney; support and treat.

EU Main Hazards
Highly flammable.
Irritating to eyes.
Vapors may cause drowsiness and dizziness

5. FIRE FIGHTING MEASURES

Extinguishing Media
Use foam, dry chemical or carbon dioxide. Be aware of the possibility of re-ignition. Keep containers and surroundings cool with water spray.

Unusual Fire and Explosion Hazards
Vapors can travel a considerable distance to a source of ignition and flashback. Flashback can occur if air temperature exceeds flash point. Be aware of possibility of re-ignition.

Protective Equipment for Fire-Fighting
Wear full protective clothing and self-contained breathing apparatus.

6. ACCIDENTAL RELEASE MEASURES

Contain and absorb using earth, sand or other inert material. Transfer into suitable containers for recovery or disposal. Wear appropriate protective clothing. Eliminate all sources of ignition. Vapors can accumulate in low areas. Consider need for evacuation. Prevent the material from entering drains or water courses. Notify authorities if spill has entered water course or sewer or has contaminated soil or vegetation.

7. HANDLING AND STORAGE

Use in well ventilated area. Use local exhaust ventilation. Avoid inhaling vapor. Avoid contact with eyes, skin and clothing. Keep container tightly closed when not in use. Store away from sources of heat or ignition. Storage area should be: cool - dry - well ventilated - away from incompatible

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

**Occupational Exposure Standards**

Exposure Limits are listed below, if they exist.

- **Isopropyl alcohol**
  - UK EH40: OES 400ppm (980mg/m³) 8h TWA.
  - UK EH40: OES 500ppm (1225mg/m³) 15min TWA.
  - ACGIH: TLV 200ppm (980mg/m³) 8h TWA.
  - ACGIH: STEL 400ppm (1225mg/m³) 15min TWA.
  - OSHA: PEL 400ppm (980mg/m³) 8h TWA.

Can be absorbed through skin.

**Engineering Control Measures**

Good general room ventilation is expected to be adequate to control airborne levels.

**Respiratory Protection**

Respiratory protection if there is a risk of exposure to high vapor concentrations. The specific respirator selected must be based on the airborne concentration found in the workplace and must not exceed the working limits of the respirator.

**Hand Protection**

Chemical resistant gloves

For isopropyl alcohol, gloves made of polyvinyl alcohol do not provide adequate protection.

**Eye Protection**

Chemical goggles or safety glasses with side shields

**Body Protection**

If there is danger of splashing, wear: - overall or apron
