Breathing Easy with Medline

You’ll find solutions for all your patients, from neonates in hospitals to adults at home, in our wide selection of respiratory products. With over 350,000 different items for the entire continuum of care, Medline is the largest privately held manufacturer and distributor of healthcare supplies in the United States. Plus, we have teams of experienced clinicians and product specialists who understand the challenges of providing respiratory care.

**Improving Clinical Outcomes.** At Medline, we constantly seek out and develop products that can help improve outcomes in respiratory patient populations. Our portfolio spans acute to long-term, pediatric to geriatric and facility to home-based care.

**Improved Respiratory Tools.** The needs of the respiratory caregiver and the needs of the respiratory patient are what inspires Medline. The knowledge and insights from fellow respiratory professionals help us to continuously improve our products.

**Business and Value-Oriented.** Our wide selection includes a variety of products for every aspect of good respiratory care, so you can customize ordering and maximize savings. Respiratory products are, and always will be, an integral component of the overall value you have come to expect from Medline.

OXYGEN

Medline’s extensive breadth of oxygen delivery products includes all your everyday essentials along with some innovative solutions. Our SuperSoft Nasal Cannulas are made of a soft material that is very gentle on skin. So soft, in fact, that bulky foam ear cushions are no longer needed, which can reduce costs while improving patient care.

SuperSoft Nasal Cannulas

Fight breakdown of delicate skin.

Even with only short-term oxygen cannula use, sores can develop on the skin of a patient’s ears and cheeks. Medline’s SuperSoft nasal cannulas provide a gentle solution. SuperSoft is made of an advanced material that is soft, flexible and non-sticky. You’ll notice the difference right away!

Maintain skin integrity
- Reduce pressure and friction on delicate ear and face tissue

Improve patient compliance with added comfort
- New patients are less apprehensive of wearing a cannula
- Existing patients can’t believe how comfortable and gentle they are

Reduce costs
- Treat fewer cannula-related sores
- Bulky foam ear cushions are not needed

Medical Gas Hose Assemblies

Tenacore offers custom-configured medical gas hose assemblies in five easy steps:

- Select conductive or non-conductive hose
- Select the inlet fitting (gas service and type)
- Select gas service
- Select the outlet fitting (gas service and type)
- Specify the hose length

TCT = Tenacore Hose Assembly

**X = Hose Type** (1/4" ID for pressure gases, 5/16" ID for vacuum)

- A = 1/4" ID Non-Conductive
- B = 1/4" ID Conductive
- C = 5/16" ID Non-Conductive
- D = 5/16" ID Conductive

**AAA = Gas Service**

- OXY = Oxygen
- VAC = Vacuum
- N2O = Nitrous Oxide
- INA = Instrument Air
- AIR = Medical Air
- NIT = Nitrogen
- CO2 = Carbon Dioxide
- WAG = Waste Anesthetic Gas Disposal

**B = Inlet Fitting** (Connects to the Source)

- A = 1/8" Male Pipe Thread
- C = 1/4" Male Pipe Thread
- E = DISS Female Hex Nut
- G = Chemetron® Adapter
- I = Puritan-Bennet Adapter
- K = Schrader Adapter, Swivel
- B = 1/8" Female Pipe Thread
- D = 1/4" Female Pipe Thread
- F = DISS Female Hand-tight
- H = Ohmeda® Adapter
- J = Schrader Adapter, Non-Swivel

**C = Outlet Fitting** (Connects to the Medical Device)

- A = 1/8" Male Pipe Thread
- C = 1/4" Male Pipe Thread
- E = DISS Male with Check
- G = DISS Female Hand-tight
- I = DISS Male, NO CHECK, with Grip
- K = Ohmeda Coupler
- M = Schrader Coupler
- B = 1/8" Female Pipe Thread
- D = 1/4" Female Pipe Thread
- F = DISS Female Hex Nut
- H = DISS Male, NO CHECK
- J = Chemetron Coupler
- L = Puritan-Bennet Coupler

**DDD = Hose Length**, in Inches (e.g. 036, 048, 144, etc.)

**EXAMPLE**: TCTAOXYFE060 1/4" ID non-conductive oxygen hose assembly with a DISS female hand-tight inlet and a DISS male with check outlet, 60" in length.
Gentec® Flowmeters

Antimicrobial*, environmentally friendly, and exclusively distributed nationwide by Medline.

- Antimicrobial and environmentally friendly additive in the rotary knobs*
- For both oxygen and medical air
- Thoroughly tested for accuracy
- Durable polycarbonate hood and metering tube
- Available in nickel plated solid brass or aluminum
- Stainless steel ball float
- Warranty: ten years (manufacturer)

**OPTIONS:**
- Flowmeters listed above are aluminum. For brass, change the A to a B (example: GTFM187A15LOH to GTFM187B15LOH)
- Dual flowmeter with 2 power take-offs, also available

**SPECIFICATIONS:**
- Weight (No Adapter): Aluminum Body: 4.24 oz/122 gm
  Brass Body: 6.64 oz/188 gm
- Increment: 0-6 LPM in ½ LPM increment, 6-15 LPM in 1 LPM Increment
- Flush Flow Rate: 65 LPM (depending on supply flow)
- Max Inlet Pressure: 100 psig
- PTO Flow Rate: Over 100 LPM (depending on supply flow)

* This product does not protect users or others against disease-causing bacteria.
Gentec Neonatal, Perinatal and Specialty Flowmeters

The performance and accuracy you need for critical care applications for neonate through adult patients.

- 200 cc and 1 LPM models are designed for perinatal and neonatal applications where extreme accuracy under very low flow is required
- Available for oxygen and air
- Acrylic block provides a strong flow tube
- Maximum inlet pressure: 100 PSI
- Outlet: DISS male (9/16”-18UNF)
- Calibrated at 500 PSI
- Warranty: five years (manufacturer)
Sofnolime® 2550 CO₂ Absorber for Anesthesia Systems

A high-performance absorber offering more savings from less product usage.

- Unique D-shaped particles for increased absorption levels
- USP-grade and FDA-approved
- White-to-violet color change for quick visual indication of effectiveness/need to change
- Consistently absorbs 140–150 liters of CO₂ per kilogram of product
- Available in prepackaged cartridges and easy-pour 3-lb. bags
- KOH-free formulation and 16% moisture content to minimize the risk of CO accumulation or compound A drying out
- Dust content is typically 75% lower than USP standards, for free airflow and less contamination risk

We take great pride in offering you a comprehensive selection of advanced products for asthma management. Our Aeromist Plus™ Nebulizer Compressor is compact and durable, and it takes up very little space.

- Nebulizer Compressors 18
- Pediatric Nebulizer Compressor 19
- Portable Battery-Operated Nebulizer Compressor 20
- Handheld Nebulizers 21
- MDI Spacers 22
- Peak Flow Meters 23
- Bubble Humidifiers Respiratory Solutions 24
- Sterile Saline Solution 24
Aeromist Plus™
Nebulizer Compressor

Combining a superb design with exceptional ease of use.

Superb design
- Compact – Small footprint, so it easily fits on small surfaces
- Durable – Hard plastic shell and molded handle with no breakable hinges
- Stable – Low center of gravity when laying flat on the four non-skid rubber feet
- Convenient power cord storage – Entire cord can be kept inside the shell
- Includes nebulizer kit – Both reusable and disposable

Includes convenient instructional DVD
(HCS60004RD only)
- Provides easy, step-by-step instructions
- Minimizes the need for clinicians to explain proper usage
- Perfect for drop-shipping directly to patients or storing in physician closets
- Multi-lingual (English and Spanish)

See page 21 for our replacement nebulizer kit options

Method of nebulization: dry piston compressor

Electrical requirements: 120V / 60Hz

Sound noise level ≤ 60 dBA
Portable Battery-Operated Nebulizer Compressors

Better compliance – treatments can be easily taken, anytime and anywhere.

- Small footprint and a sleek design
- Battery operated
- Compact and lightweight
- Compatible with any jet nebulizer
- Suitable for travel
- Warranty: two years for the compressor, 6 months for the battery

Kit includes:

- Carry case
- AC/DC adapter
- Adult and pediatric masks
- 5 replacement filters
- Mouthpiece
- Medicine cup
- 7’ (2.13 m) oxygen tubing
- Manual

Did you know

The surface area of a person’s lungs is roughly the same size as one side of a tennis court.
Handheld Nebulizers

Medline offers a wide selection of reusable (up to 6 months use) and disposable (up to 2 weeks use) nebulizer kits for asthma medication delivery.

- Ideal particle size of less than five microns, increasing the amount of medication delivered deep within lungs
- Standard fittings accommodate most clinical applications
- Latex free
- Medicine can be added without removing the cap
- Each kit includes a medicine cup, 7’ (2.1 m) of kink resistant extension tubing, and either a mask or a mouthpiece with a T adapter
- Packaged 50/cs except WST0382 WST0382 packaged 12/cs

To minimize the potential for trauma to delicate airway tissues while maximizing suctioning, suction catheters have to be just the right size. Our complete selection includes 6Fr and 8Fr open suction catheters for newborn, infant and child airways. For adult airways, we offer 10Fr and larger suction catheters. With Medline, you have one convenient source for all your airway clearance needs.
Open Suction Catheters
D419 Series

Provide extra safety for newborn, infant and child airways with our flat, soft and smooth DeLee tips. Minimize trauma potential to adult airways while improving suctioning capability with our angled, soft and smooth whistle tips.

- 6 Fr and 8 Fr sizes with DeLee tips and staggered Murphy eyes
- 10 Fr and larger sizes with whistle tips and lateral Murphy eyes
- Choose from straight pack, coiled or poly-cath packaging options

Promotes Better Protection from Cross-Contamination.

In an independent laboratory evaluation, Medline suction catheters with the Contro-Vac valve were compared to leading manufacturers’ catheters with chimney valves. The results: Medline’s Contro-Vac valve was more effective at preventing the release of contaminants during suctioning.¹
Suction Catheter Kits and Trays (D409 Series)

Choose from a full range of sizes and multiple packaging options with Medline’s suction catheter kits and trays.

- All kits contain high-quality Medline Aloetouch® 3G Stretch Synthetic gloves to help soothe dry hands.
- Minimize trauma potential with any airway size while improving suctioning with the right tip, eyes and French size.
- 8 Fr sizes have DeLee tips and staggered Murphy eyes; 10Fr and larger sizes have whistle tips and lateral Murphy eyes.

Sleeved Catheters (D407 Series)

The sleeves around these open suction catheters help reduce the possibility of cross-contamination.

- Sleeved catheter and cup (kits only) help reduce cross-contamination.

We can build a custom kit to your exact specifications. Medline is a leading manufacturer of custom procedure kits.
Phoneris® & Aeroflex®
Inner Cannula & Ventilator Circuit Connector

Decrease the likelihood of ventilator disconnections.

The Phoneris/Aeroflex system offers significant design improvements over similar tracheostomy inner cannula and ventilator connectors. A better design for connecting tracheostomy patients and ventilators.

- Safer – A secure connection reduces risk of accidental or incidental disconnects
- Gentler – Swivel enables comfortable movement; less torsion on stoma
- Easier – No need for improvised, unapproved securing devices

TrachVox® Tracheal-Connected Heat and Moisture Exchanger

Innovative technology helps spontaneously breathing tracheostomy patients to verbally communicate.

- When depressed, the HME changes the airway flow and makes speaking possible
- Comfortable, compact and lightweight
- Minimizes tracheostomy tube movement
- Heats and humidifies inspired air of spontaneously breathing patients
- Delivers supplemental oxygen through integrated port
- Allows for forced inspiration, expiration and suctioning
- Meets ISO 9360-1
- Standard 15 mm connector

24-Hour Closed Suction Catheters

Improve patient care while saving staff time with Medline’s 24-hour closed suction catheters.

- Less physiologic disturbance – the PEEP (positive end expiratory pressure) is preserved and the small air sacs and alveoli in the lungs remain open
- Reduced chance of complications – closed suction catheters may decrease complications associated with suctioning and alveolar derecruitment
- Studies show that a focused education program using a common protocol can improve clinical outcomes and reduce costs of medical care.
- Color-coded locking valves

Gentec®
Suction Regulators

Exclusively distributed nationwide by Medline.

- Antimicrobial and environmentally friendly additive in the rotary knobs and selector switches*
- Extremely durable
- Continuous-only and continuous/intermittent designs
- Available with a variety of inlet and outlet fittings and suction trap assemblies
- Warranty: ten years (manufacturer)

User-friendly mode selector
Large, user-friendly mode selector switch and a 1.25" (3.2 cm) diameter adjustment knob

Large diameter gauge and Easy-to-read numbers
Large 2.5" (6.4 cm) diameter gauge with glow-in-the dark scale and arrow

Color-coded
Color-coded to help facilities manage inventory and allocation across different departments

Continuous/Intermittent (881 series)
- Available with ranges of 0-160 mmHg and 0-300 mmHg
- Settings include continuous, off and intermittent
- Factory default settings for on/off cycles are 16 seconds (± 2) on, 8 seconds (± 2) off; on/off settings can be adjusted without opening the case (controls are not accessible without tools)

Continuous Only (882 Series)
- Available with ranges of 0-300 mmHg and 0-760 mmHg
- Settings include regulated, off and full

*This product does not protect users or others against disease-causing bacteria.

Breathing stops. Blood oxygenation plummets. The brain panics and responds: Stop! Hey! Wake up! Breathe! With a snore or a snort, the breathing begins again and you drift back to sleep. Until the next episode. For the sleep apnea patient, this scenario may play out hundreds of times during one night of sleep. Not only does it mean poor quality sleep and drowsy, accident-prone days, it also is associated with heart attack, arrhythmias, hypertension, stroke and diabetes.⁴

Continuous Positive Airway Pressure (CPAP) by Medline

In obstructive sleep apnea treatments, Medline’s CPAP unit delivers precise, reliable therapy to your sleep apnea patients.

Effective Treatments
- 4-20 cm H₂O pressure range
- Variance <0.5 cm H₂O (low), <1.0 cm H₂O (high)
- 3-level expiratory unloading technology (EUT) makes exhalation easier

Patient Comfort
- Optional humidifier warms and moistens air for greater comfort and compliance
- 0-60 minute ramp time, auto-on/auto-off setting
- Library-quiet at <29 dB at 10 cm H₂O

Continuing Care
- SD card stores patient data for 365 nights
- USB connectivity with AutoManager PC software
- Washable/disposable air filters
- Power failure alarm

Weight: 2.2lb (3.08 lb with humidifier)
Silicone CPAP Masks

A consistent seal without excessive tightness, delivering the prescribed therapy with enough comfort to help improve compliance.

- OmniClip and silicone forehead pad for a custom fit at the bridge of the nose for patients of all head shapes and sizes
- SilentVent elbow flushes out exhaled air quietly, without an additional inline exhalation port
- Headgear attaches with convenient clips, includes a handy wash bag to keep it clean and fresh
- Cushions, forehead pads, elbows, cones and clips are individually replaceable
- Available in four sizes, with and without headgear

AIRgel™ CPAP Masks

Amazing comfort with advanced gel cushioning and customized fit technology.

- Proprietary AIRgel cushioning minimizes discomfort and skin irritation while effectively sealing airflow
- The flexible and formable mask provides a custom fit – flex, fit and forget!

iQ Blue® Nasal Gel Mask

- One-size nasal mask design fits a wide variety of patients
- Clearest field of vision possible with no forehead pad required – patients can keep their glasses on while reading or watching TV
- Easy on-and-off thanks to quick release, breathable headgear

Mojo® Full-Face Gel Mask

- Full-face design in three sizes
- Adjustable tension wheel minimizes discomfort while ergonomic cushions adapt to unique facial features for a comfortable fit
- Magnetic headgear clips hold firmly and disconnects with one hand easy on-and-off

MiniMe® 2 Pediatric Gel Mask

- Nasal mask in two sizes, designed for children ages 2 to 12
- Touchless spacebar eliminates the need for any forehead contact
- Soft, breathable headgear for all-night comfort
- Available in vented and non vented designs

### Filter HME's

Medline’s wide range of choices ensures compatibility with your equipment.

- Choose from both angled and straight designs
- Electrostatic and HEPA configurations available
- Choose from a wide range of tidal volumes, from 90 ml to 1,500 ml
- Translucent housing makes it easy to see possible obstructions
- HME media foam composition

The annoying hiss of a pneumatic conserver can reduce a patient’s compliance with recommended treatment. Our EconO₂mizer II Single-Lumen Pneumatic Conserver is among the quietest pneumatic conserving devices available today. It features six conserving flow settings – including 2.5 – and it weighs just 13-oz. At Medline, we constantly strive to provide innovative tools for helping you improve patient outcomes.
EconO$_2$mizer II
Single-Lumen Pneumatic Conserver

Less noise, for better compliance
Among the quietest pneumatic conserving devices available!
- Very quiet with no hissing during pulse delivery
- Aids in compliance with ambulatory patients
- 6 conserving flow settings (1, 2, 2.5, 3, 4, & 5)
- 3 continuous settings (2, 3, & 4)
- Features all-brass construction in high-pressure zones
- Weight: 13-oz.
- Size: 4.8" x 2.4" x 1.5" (12.2 cm x 6.1 cm x 3.8 cm)
- 5.7:1 conserving ratio

EconO₂mizer Dual-Lumen Conserving Device

A breakthrough in conserving-device technology!

- All-brass diaphragm and 4:1 conserving ratio for fewer service calls
- Light and compact
- 0-6 LPM
- Dual mode for conserving and continuous flows
- 11 settings for each mode (no additional regulator required)
- Solid brass core

Rack’n Roll Modular Cylinder Cart

For easy moving and storing of aluminum medical cylinders.

- Completely modular
- Heavy-duty rubber tires (removable for stationary cart)
- Telescoping with adjustable holder height, enabling each tank tray to accommodate different sizes
- Comfortable handgrip
- Six-cylinder carts can link to make larger systems (12, 18, 24 cylinders)

RESUSCITATION

A vital medical device, the manual resuscitator helps an unconscious person who is not breathing to remain oxygenated. At Medline, we’re proud to offer a wide variety of high-quality, innovative resuscitators.

- Manual Resuscitators  54
- Manual Resuscitator Ordering Guide  55
- Mouth-to-Mask Resuscitators with Valve  56
Manual Resuscitators

Innovations provide clinicians with improved ease of use. Available in infant, pediatric and adult sizes.

A Better Bag
- Delivers up to 99% FIO₂
- Maneuverable – The body of the bag swivels 360 degrees for multiple clinician hand positions, helping to reduce clinician fatigue
- Translucent – The translucent, lightweight bag body and components allow for visualization of vomitus or occlusions in the system
- Textured – Provides an enhanced, non-slip grip
- Repositionable – The patient port swivels 360 degrees, allowing the clinician freedom to move around the patient without placing excessive torque or stress on the tracheal tube or mask

An Improved Mask
- Firmly Sealing – Premium material provides a soft cushion and a firm seal

Mouth-to-Mask Resuscitator with Valve

Ready-to-use disposable CPR mask.
- Highly effective one-way valve helps protect the rescuer and patient at the same time
- Easy placement with clear plastic design
- Improved fit and patient comfort with soft inflated cuff
- Standard 22 mm fitting is compatible with any resuscitator
- Easy-to-understand illustrations printed on the hard plastic carrying case

**Did you know**

Effective bystander CPR provided immediately after sudden cardiac arrest can double or triple a victim’s chance of survival, but only 32 percent of cardiac arrest victims get CPR from a bystander.6
With Medline, you’ll find everything you need to measure a patient’s pulse, blood oxygen saturation, and more. Your clinicians can quickly and easily monitor oxygen saturation and heart rate with our light and compact fingertip pulse oximeters. Our handheld pulse oximeters feature visual and audible alarms, including a remote alarm through the nurse call system.

**Fingertip Pulse Oximeters**

Medline's rugged fingertip pulse oximeters provide quick and accurate SpO₂ readings – anywhere, anytime!

- Accurate
- 8 second shut off feature helps save battery life
- Multi-directional display is readable from any angle (excludes Fingertip Pulse Oximeter BCE300C61)
- Light weight for comfort and convenience
- Comfortable
- Easy-to-use
- Batteries included

Handheld Oximeters

**Dependable and easy-to-use pulse oximeters with alarms for spot checks and continuous monitoring.**

**SPECTRO₂® 30 Digital Pulse Oximetry System**
- Visual and audible alarms, including a remote alarm through the nurse call system
- Low perfusion
- Motion tolerance
- 4 AA batteries

**SPECTRO₂® 10 Pulse Oximetry System**
- Large, bright LED display
- Simple, one-handed operation
- Durable construction
- Comfort clip finger sensor
- 4 AA batteries

**Medline MD300**
- LED color display
- The touch of a button adjusts to your choice of two readout sizes and ten levels of brightness
- 8 second shut off feature helps save battery life
- Protective silicone cover included

A sneeze can reach speeds of over 100 mph.
Pulse Oximeter Probes

Medline has probes for a wide variety of pulse oximeters, including handheld and tabletop models, such as the popular 7-pin Nellcor® and 9-pin BCI®.

- Probe choices for unique requirements, materials and applications
- Disposable probes in neonatal through adult sizes
- Reusable probes in pediatric and adult sizes
- Micro-Foam for easy sensor application and repositioning, Medplast for maximum adhesive for long-term use in one location, or Transpore for transparency with repositioning
