

Sterillium® Comfort Gel™

Healthcare Personnel Hand Antiseptic

Increase efficacy. Enhance skin moisture. Improve compliance.

Sterillium Comfort Gel

Efficacy. Comfort. Compliance.

Sterillium Comfort Gel is a scientifically proven, moisturizing, easy-to-use gel. Sterillium Comfort Gel not only meets all test and key use criteria – it far exceeds them. Read on to see how you can improve hand hygiene in your facility!

- Kills ≥ 99.999 percent¹ of a broad range of nosocomial pathogens within 15 seconds, without water
- Non-irritating*
- Moisturizing*
- Cost effective: 2.4 mL / application*
- Latex and non-latex glove compatible*
- CHG compatible*

Efficacy

In Vitro Time Kill Study

Most important nosocomial pathogens	Reduction in 15 seconds	
	Log ₁₀ [*]	%
<i>Candida albicans</i> , ATCC 10231	5.88	99.99987
<i>Clostridium difficile</i> , ATCC 9689 ²	5.34	99.99954
<i>Enterococcus faecalis</i> , ATCC 29212	7.06	99.99999
<i>Enterococcus faecalis</i> , VRE, Clinical isolate 02013	7.15	99.99999
<i>Escherichia coli</i> , ATCC 11229	6.68	99.99998
<i>Haemophilus influenzae</i> , ATCC 19418	5.86	99.99986
<i>Klebsiella pneumoniae</i> , ATCC 11296	6.58	99.99997
<i>Proteus mirabilis</i> , ATCC 7002	6.78	99.99998
<i>Pseudomonas aeruginosa</i> , ATCC 15442	6.56	99.99997
<i>Salmonella enteritidis</i> , ATCC 13076	6.79	99.99998
<i>Serratia marcescens</i> , ATCC 14756	6.87	99.99999
<i>Staphylococcus aureus</i> , ATCC 6538	6.29	99.99995
<i>Staphylococcus aureus</i> MRSA, ATCC 33591	6.60	99.99997
<i>Staphylococcus epidermidis</i> VISE, Clinical isolate 99289	6.70	99.99998
<i>Streptococcus pneumoniae</i> , ATCC 6304	5.34	99.99954
<i>Streptococcus pyogenes</i> , ATCC 19615	6.14	99.99993

Table 1: Test method follows FDA TFM for Health-Care Antiseptic Drug Products (13). Sterillium Comfort Gel achieves $\geq 5 \log_{10}$ (≥ 99.999 percent!) reduction of all these and 55 other tested germs within 15 seconds (1).

Figure 1: Test method follows FDA TFM for Health-Care Antiseptic Drug Products (13) and compliant with ASTM E1174, Standard Test Method for Evaluation of Healthcare Personnel Handwash Formulations. In vivo testing shows, use of only 2.4 mL of Sterillium Comfort Gel exceeds the FDA TFM efficacy requirements (2).

Comfort

Alcohol-based healthcare personnel hand antiseptics are intended for frequent, repeated use. Therefore, dermal tolerance is critical: In Human Repeat Insult Patch skin testing with 213 test persons, Sterillium Comfort Gel did not demonstrate any potential for eliciting dermal irritation or sensitization at all points in time (3).

Sterillium Comfort Gel increases skin moisture content when used frequently (4).

Figure 2: Sterillium Comfort Gel significantly increases skin hydration after only one week of product usage compared to untreated skin (4).

Compliance

In the United States, one of every 136 patients becomes severely ill as a result of hospital-acquired infections (HAI), leading to about 80,000 deaths per year (5). Better hand hygiene compliance could reduce the potential for infection. Compliance is intrinsically tied to product acceptance. In other words, **comfort drives compliance**. With Sterillium Comfort Gel, you have a product that can help overcome potential barriers to compliance.

Trading economy for efficacy

Directions for the competitors' preparations we tested state to apply enough product to thoroughly cover the hands (9,10,11), but they do not mention a specific volume. Our test showed that 2.4 mL is sufficient to entirely cover the hands and nails, and this applies to three competitor's products as well. However, at this 2.4 mL test volume, Prevacare and 3M Avagard D failed to meet the FDA TFM efficacy requirement. Although less effective than Sterillium Comfort Gel, Purell Instant Hand Sanitizer achieved the required 2 log₁₀ reduction with 2.4 mL.

Figure 3: Test method follows FDA TFM for Health-Care Antiseptic Drug Products (13) and compliant with ASTM E1174, Standard Test Method for Evaluation of Healthcare Personnel Handwash Formulations. Sterillium Comfort Gel in comparison to three other alcohol-based hand sanitizers available on the market (12).

Based on the independent testing data, the application amounts of Purell Instant Hand Sanitizer, Prevacare and 3M Avagard D have to be increased in order to achieve a significantly higher efficacy.

Figure 4: The competitors' preparations need an amount of 3.6 mL in order to reach the excellent efficacy Sterillium Comfort Gel already achieves with 2.4 mL! (12)

With these results, Sterillium Comfort Gel delivers great value!

Ingredients

Sterillium Comfort Gel's active ingredient is Ethyl Alcohol, 85 percent (w/w), formulated with a well balanced blend of emollients leveraging the skin care technology of Nivea® and Eucerin®.

Performance

- Meets FDA Tentative Final Monograph¹³, CDC Guideline for Hand Hygiene in Health-Care Settings¹⁴ and WHO Practical Guideline¹⁵.
- Compliant with NFPA (16) fire safety standards
- Range includes ADA-compliant (17) dispensers, pocket bottles, and tabletop pump bottles
- Latex and non-latex compatible
- CHG compatible*

Sterillium Comfort Gel

Sterillium Comfort Gel Application Instructions

Apply 2.4 mL of Sterillium Comfort Gel to hands, one pump per hand.

Thoroughly cover entire surface, including fingertips and nails. Rub hands until dry.
