August 05, 2022
Subject: Abbott Inventory Update: Nutrition Products

Abbott continuously reviews our inventory to provide customers with the most up-to-date and accurate product availability information as possible. The table below lists products that are currently low in inventory. We apologize for the current inventory position on our pediatric specialty products and are doing everything we can to address the situation.

The table below provides suggested alternatives to meet the nutritional needs of your patients. Healthcare professionals should determine the best alternative product and transition plan for patients.

*Intermittent batch releases in August may allow for ordering of this product
**Complete nutrition in a tube-feeding formula made with organic fruits and vegetables. The use of tube-feeding products must be determined by the healthcare professional. When patients need to change to a new formula, please work with that patient’s healthcare professional to determine the best alternative product and transition plan.

For questions regarding your orders or for other information about Abbott’s nutrition products, please contact our Customer Service team at 1-800-551-5838. If ordering through a distributor, work directly with your distributor representative on alternative product availability.
Sincerely,

Matt Beebe
Divisional Vice President and General Manager, Therapeutic Nutrition
