March 4, 2022

Product supply notice:

Dear BD Valued Customer,

This letter is to inform you that BD is experiencing intermittent supply constraints on the Autoguard Family 20g x 1.88in. BD continues to closely monitor inventory and customer ordering patterns and is partnering with manufacturing to maximize output and support supply continuity. These supply constraints may result in longer than anticipated order fulfillment for select items noted in the chart below.

While we continue to meet overall demand for many of our products, BD may experience tight supply of the Autoguard Family 20g x 1.88in. We remain committed to partnering with our channel partners and customers to address existing supply needs. Until our supplier resumes normal operations, inventory controls are in place for these products.

BD is reminding customers and channel partners of the important role they play in maintaining availability of the Autoguard Family 20g x 1.88in for the greater public health need, including:

- Do not order quantities in excess
- Do not stockpile or increase levels for par
- Do not "pull forward" orders that would typically be placed in the future

We anticipate shipments of the Autoguard Family 20g x 1.88in to resume in May 2022. Until our supplier resumes normal operations, inventory controls are in place for these products.

The table below is a list of impacted products.

### Supply constrained product information

<table>
<thead>
