December 2021

Product Supply Notice: BD Anesthesia supply constraint

Dear Customer

This letter is to inform you that BD is experiencing intermittent supply constraints on the BD Anesthesia portfolio including spinal / epidural needles, loss of resistance (LOR) syringes, and kits. The intermittent supply constraint is driven by a shortage of supply of our top web packaging materials. BD continues to closely monitor inventory and customer ordering partners with manufacturing to maximize output and support supply continuity. These constraints may result in longer than anticipated order fulfillment for select items noted in the table below.

We anticipate a delay in some shipments that will impact receipt of your orders until the end of April. Until our supply resumes normal operations, inventory controls are in place for these products.

- Do not order quantities in excess
- Do not stockpile or increase levels for par
- Do not “pull forward” orders that would typically be placed in the future.

The table below provides a list of all impacted products. BD will keep customers informed on the status of this situation and will continue to explore all possible alternatives in procuring this product for your clinical needs.

For further information:
Please contact your local BD sales associate or BD Customer Care at 1-844-823-5433 or https://www.bd.com/en-us/support.

We appreciate your business and look forward to continuing to be your partner of choice in advancing the world of health.

Kind regards,

Nicholas Denise
Sr. Marketing Manager
Medication Delivery Solutions
