Subject: 3M™ Electrodes Supply Update

May 19, 2022

Dear Valued 3M Partner,

The purpose of this letter is to provide an update on the supply status of 3M™ Electrodes. The global supply chain challenges have limited 3M’s ability to respond to the high demand for 3M™ Electrode products.

We are glad to share that 3M teams have been working hard to improve production levels and that product has continued to be available and flow through supply chains.

We understand the challenge delayed orders may present to you, and greatly appreciate your patience as we work to continually improve supply levels.

The below 3M brand electrodes are in rolling backorder and projected recovery dates vary by SKU. Please see the below table for SKUs in backorder and tentative recovery dates. At this time, we are pleased to offer the following list of substitute options for the corresponding backordered product:

<table>
<thead>
<tr>
<th>Backordered Product:</th>
