June 2023

Dear Healthcare Professional,

We want to inform you that we are currently experiencing tightness on our inventory levels of RhoGAM® Ultra-Filtered PLUS [Rho(D) Immune Globulin (Human)] (300 µg) across all SKUs and assure you that we are closely monitoring the situation to minimize any potential impact on valued customers like you. It is important to note that this temporary situation is unrelated to the quality of RhoGAM, and we want to emphasize that maintaining the highest standards of quality and reliability remains our highest priority.

Please know that we are actively working with our manufacturing partners to optimize our SKU mix and streamline our processes. Our primary goal is to swiftly return to regular inventory levels as soon as possible. We understand the importance of having an uninterrupted supply of RhoGAM for patients, and we are making those patients our priority.

In light of the current situation, we are asking facilities to please work with their distributors and order based on true current need, kindly avoid placing stocking orders. This may mean ordering fewer syringes or ordering less frequently than usual. At this time, we do not anticipate the inability to fulfil necessary orders.

We sincerely apologize for any inconvenience caused by the current tightness in RhoGAM inventory. We truly appreciate your patience and support as we navigate through this. Rest assured that we are doing everything in our power to resolve this situation promptly and resume normal operations.

Thank you for all you do for your patients and for your loyalty to RhoGAM.

Sincerely,

Jennifer Bayliss
Senior Marketing Manager - RhoGAM
