Slings and lifting accessories

Slings and other lifting accessories are a key part of the extensive range of Guldmann equipment for lifting, moving and positioning people.

Specially designed slings make it easy, practical and quick for the carer to support the user while being lifted and moved from one point to another, as well as ensuring that the carer can undertake such operations with a minimum of effort and strain.

All Guldmann slings are designed for use with both mobile and ceiling hoist systems, and are ideal for moving people to and from beds and wheelchairs, as well as in sitting and lying positions, as required.

Disposable Slings
Many Guldmann sling styles are also available as Disposable slings, providing the same comfort and safety, with the added value of convenience and improved infection control.

Special Guldmann sling designs are available for lifting and moving users with:
- different abilities to participate actively
- different degrees of body control and muscular strength
- different degrees of mobility
- single and double amputations
- special needs
and for both adults and children of many different sizes and weights.

They can also be used as integral parts of training and activity programmes for users. All Guldmann slings are easily washable, to help ensure the best possible hygiene.

Accessories
In addition to slings, Guldmann provides a wide range of specially designed lifting accessories for helping both the user and carer ensure greater mobility with less effort. At the same time, they allow the carer to provide the best possible assistance, while working in ergonomically correct positions.
1. Colored loops
The colored loops ensure symmetry in the lift

2. Material
Dirt repellent polyester characterized by its strength and elasticity

3. Padding on legs
All slings with divided leg supports have inset foam pads on legs. Easier to put on – smoother on skin

4. Center of sling indicator

5. Information-label
Indicates all that the carer needs to know

6. Label with size indication
Makes it easy and simple to find the correct size of sling

7. Padding in back section
For added comfort on models with small back surface

8. Auxiliary straps
It is possible to use auxiliary straps

9. Positioning pocket
All Basic slings are provided with a pocket to ease correct positioning of sling

Fit
Improved fit and more sizes to choose from for added comfort and safety

Strength
Max. capacity increased to 560/1100 lbs (255/500 kg)

Washing
Easy handling, the sling can be washed at 176°F and tumble-dried
Slings

**Trainer**

**Function**
Provides support around the chest and shoulder areas. Detachable leg straps give support around the hip area and prevent the user from sliding out of the sling.

**Suitable for**
- persons with reduced body balance, but must be able to bear weight on their legs
- walking training • supported standing and upright postures.

**Micro**

**Function**
Supports the upper part of the body (from upper pelvis till under the shoulders) around the chest and upper thigh. The belt has a re-tightening function if necessary to adjust the support around the body.

**Suitable for**
- lifting persons with head control, but with reduced muscular strength of upper part of the body and above hip joint and thighbone
- in situations where the sling should be put on and taken off easily • lifting to and from seated position • in certain situations also lifting to and from a half-lying position together with Guldmann head support
- situations where a large opening at the bottom is required, such as access for toileting and hygiene.

XS-XXL... 2840xx
Slings

Basic Basic

Function
Supports the whole body excluding the head.

Suitable for
• lifting persons with head control and with or without body control • lifting to and from a seated or half-seated position (bed and wheelchair etc.) • lifting and transfers from all patient furniture surfaces.

Basic Low

Function
Supports the body up to shoulder height.

Suitable for
• lifting persons with head and body control • lifting to and from a seated position, (chair and bed etc.) • lifting and transfers from all patient furniture surfaces.

Basic High

Function
Supports the whole body including the head.

Suitable for
• lifting persons with little control over their head and body • lifting to and from a lying position (bed and floor etc.) • lifting to and from a seated position • lifting and transfers from all patient furniture surfaces and the floor.
Sit-On Function
Supports the thighbone and back. The user sits on the sling. Added bands fixed across the opening at each side of the sling prevent the user from falling out sideways. Not suitable for persons with pressure sore problems.

Suitable for
• persons who remain on the sling for long periods due to high weight or customized wheelchair.

Other features
• helps reduce the risk of sliding out of wheelchair • material prevents heat generation between body and sling • sling is fitted on the person while lying, but is used when lifting to and from a seated position in bed or wheelchair.

Sit-On High Function
Supports the thighbone, back and head. The user sits on the sling. Added bands fixed across the opening at each side of the sling prevent the user from falling out sideways. Not suitable for persons with pressure sore problems.

Suitable for
• persons who remain on the sling for long periods due to high weight or customized wheelchair.

Other features
• helps reduce the risk of sliding out of wheelchair • material prevents heat generation between body and sling • sling is fitted on the person while lying, and is used when lifting to and from a lying position.

Amputee Function
Supports the whole body up to shoulder height and the pelvis region.

Suitable for
• lifting both single and double (above knee joint) amputees • lifting double and high amputees • lifting from a lying position. Head support should be used to support head.

Slings
Basic Basic

Function
Supports the whole body excluding the head. The inside belt offers an extra support of the body.

Suitable for
- lifting persons with head control and with or without body control
- lifting to and from a seated or half-seated position (bed and wheelchair etc.).

Suitable for
- lifting persons with little control over their head and body
- lifting to and from a lying position (bed, changing bench and floor etc.)
- lifting to and from a seated position.

Basic High

Function
Supports the whole body including the head. The inside belt offers an extra support of the body.

Suitable for
- lifting persons with little control over their head and body
- lifting to and from a lying position (bed, changing bench and floor etc.)
- lifting to and from a seated position.
Leg sling
Used when legs need lifting and support. Possible activities are dressing, apply therapeutic sock/hose, access to hygiene, support of leg to apply ROM devices.
_Packed in boxes of 10 slings._

Repositioning sling, 1100 lbs (500 kg)
A sling for use as part of the linen make-up of the patient bed; leave positioned underneath patient, ready to use for care tasks. Suitable for: rolling to sidelying, repositioning patient up in bed, sitting forward head and trunk, supine lateral transfers to another surface such as beds + stretchers, and full lift in supine off of bed to zero bed scale, stripe linen, or other.
_Packed in boxes of 10 slings._

Turner
Enables placing of sling under patient without having to roll or move them. Smaller surface area of material for this sling allows access to patient’s skin for inspection, treatment and care.

_Twin Turner_
Makes it possible to roll a patient on both sides without removing the sling. Enables placing of sling under patients without having to roll or move them. Smaller surface area of material for this sling allows access to patient’s skin for inspection, treatment and care.
