CLEAN UP ON SAFETY, EFFICIENCY AND SAVINGS.

Cleaning Chemical Systems
Developed for Healthcare
TEN WAYS THAT MEDLINE CLEANING CHEMICALS HELP YOU IMPROVE SAFETY AND EFFICIENCY.

Multilingual Labeling
English, Spanish and French.

Metering Tips
Leak-proof valves help ensure that no chemicals will be spilled. Metering tip is in the bottle, which delivers the right dilution everytime!

Intuitive Icons
Provides at-a-glance identification for area of use.

Product Color-coding
Provides easy training and product selection.
**Improved safety with the right dilution**

If the dilution is too strong, the chemicals can pose health risks to people. If the dilution is too weak, it can be ineffective at stopping the spread of germs or removing soils.

With some other systems, the dispensers and metering tips can be calibrated to different flow rates, producing imprecise dilutions. Medline dispensers and metering tips are both calibrated to deliver exactly 2.5 gal. per minute (gpm), for the right dilution, every time.

**Less waste from using only the chemicals you need**

» With more precise chemical dilutions, you avoid wasting your concentrated chemicals
» Each chemical bottle’s plug is virtually impossible to remove, putting an end to hand pouring
» The metering tip can’t be tampered with because it’s secured inside the chemical bottle

**A time-saving bottle-fill**

» Fills at 2.5 gpm – how fast does yours fill?
» Lower drop height means less foam and less waiting for foam to dissipate
» Supports one-handed bottle filling

**An easy-to-use bucket-fill**

» Remote fill, so you don’t have to hold a button down at the dispensing cabinet
» Convenient gas-style pump for filling the bucket or auto scrubber

**Virtually maintenance-free**

» The dilution is controlled by water pressure, not by cables that can break over time – A Medline Innovation
» The premium cabinets are made of rugged impact-resistant resin
» The metering tips don’t clog because they are in the bottles, not in the dispenser, so you get a fresh one with every chemical change

**Easy training and product selection**

» Color-coding – each chemical’s concentrate bottle, spray bottle and in most cases even the color of the chemical itself are the same color
» Educational labeling – intuitive icons provide at-a-glance identification of the correct area of use of each chemical

**Easy operation**

Simply turn the dial to select the desired chemical.

**SKU consolidation**

For example, the Medline disinfectant can be used on ALL surfaces within a healthcare facility, including floors, table tops, and even glass – most disinfectants streak on glass, but ours does not.

**Streamlined chemical purchasing**

Our smaller portfolio is focused on the needs of hospitals – not education, government, banks, retail, arenas, etc. You can clean your entire facility with a maximum of 15 SKUs.

**Strong, effective cleaning products**

To help you provide a safer, more sanitary environment for your patients, our premium chemical formulations tested to ASTM standards.\[1\]

Reference: \[1\] ASTM testing data on file.
Glass/Multi-Surface Cleaner
Streak-free on glass and reflective surfaces, and can be used to clean stainless steel.
» Non-ammoniated which makes it lower odor
» Fresh, clean scent
» For Medline Chemical Dispensing System (1:32 dilution)
