Face masks, eyewear and N95 respirators
Every protection level and preference
Choose the right mask for every procedure

Different procedures require different levels of protection, and ASTM standards make it easy for your staff to get the ideal face mask for any procedure-and for every preference.

Measuring fluid resistance, filtration and breathability, ASTM categorizes masks into three levels

**ASTM Level 1**
For procedures producing low amounts of fluid, spray and/or aerosols.

**ASTM Level 2**
For procedures producing light to moderate amounts of fluid, spray and/or aerosols.

**ASTM Level 3**
For procedures producing moderate to heavy amounts of fluid, spray and/or aerosols.
To meet ASTM F2100-19 standards, our masks undergo a series of tests for particle filtration (PFE), bacterial filtration (BFE), differential pressure or breathability (ΔP) and fluid resistance.

**Fluid resistance**
Tests penetration resistance to synthetic blood at three protection levels—80 mm Hg, 120 mm Hg and 160 mm Hg.

**Particle filtration efficiency (PFE)**
Assesses filtration ability when tested against sub-micron particulate matter 0.1 microns in size—which is representative of some viruses.

**Bacterial filtration efficiency (BFE)**
Tests filtration ability against an aerosol containing bacteria 3.0 microns in size.

**Differential Pressure (ΔP)**
Gauges air flow from one side of a mask to the other, assessing breathability.

How small is a micron?
While an actual micron is not visible to the human eye, this magnified diagram demonstrates particulate size by comparing a micron to other common substances.

Scale is approximate.
Made for comfort and protection

We know how much of your day is spent behind a mask, so we make ours with the most comfortable, effective materials possible.

Smooth cellulose—used for inner and outer facings

Silky thermalbond polypropylene—used for inner facings

Meltblown middle layer—acts as the primary filtration system for the mask

Soft spunbond polypropylene—used for inner and outer facings and for an extra layer of protection

Silk thermalbond polypropylene—used for inner facings
Our ASTM level 3 face masks are constructed of four layers for protection, comfort and breathability.

Layer 1— the colored layer is your first line of defense

Layer 2— protects against fluid while maintaining breathability

Layer 3— minimizes particle dispersal for the ultimate layer of defense

Layer 4— soft, non-abrasive inner layer makes the mask comfortable on your skin
Procedure face masks

NON27381
Cone mask
100% Polyester
- Headband
- Molded style
50/bx, 6 bx/cs

NON27120
Basic procedure mask
Spunbond polypropylene outer, cellulose inner
- Earloop style
50/bx, 6 bx/cs

NON27122
Basic procedure mask
Spunbond polypropylene outer, thermalbond polypropylene inner
- Earloop style
50/bx, 6 bx/cs

NON27375
Basic procedure mask
Spunbond polypropylene outer, cellulose inner
- Earloop style
50/bx, 6 bx/cs

NON27378
Basic procedure mask
Spunbond polypropylene outer, thermalbond polypropylene inner
- Earloop style
50/bx, 6 bx/cs

NON27420EL
Procedure mask with shield
Spunbond polypropylene outer, thermalbond polypropylene inner
- Earloop style
- Anti-fog foam
- Anti-glare strip
- Anti-fog shield
25/bx, 4 bx/cs
**NON27355**  
Low fluid protection procedure mask  
Spunbond Polypropylene outer and inner  
- Level 1 fluid resistant  
- Earloop style  
50/bx, 6 bx/cs

**NON27408EL**  
Low fluid protection procedure mask  
Cellulose inner and outer  
- Level 1 fluid resistant  
- Anti-fog foam  
- Earloop style  
50/bx, 6 bx/cs

**NON27412EL**  
Maximum fluid protection procedure mask  
Spunbond polypropylene outer, thermalbond polypropylene inner  
- Level 3 fluid resistant  
- Anti-fog foam  
- Earloop style  
50/bx, 6 bx/cs

**NON27712EL**  
Maximum Fluid Protection Procedure Mask  
Cellulose inner and outer  
- Level 3 fluid resistant  
- Earloop style  
50/bx, 6 bx/cs

**NON27410EL**  
Maximum fluid protection procedure mask with shield  
Spunbond Polypropylene outer, thermalbond polypropylene inner  
- Level 3 fluid resistant  
- Earloop style  
- Anti-fog foam  
- Anti-glare strip  
- Anti-fog shield  
25/bx, 4 bx/cs

**NON27710EL**  
Maximum fluid protection procedure mask with shield  
Cellulose inner and outer  
- Level 3 fluid resistant  
- Earloop style  
- Anti-fog foam  
- Anti-glare strip  
- Anti-fog shield  
25/bx, 4 bx/cs
Surgical face masks

**NON27402**
Basic surgical mask
Spunbond polypropylene outer, cellulose inner
- Ties
50/bx, 6 bx/cs

**NON27377**
Basic surgical mask
Spunbond polypropylene outer, thermalbond polypropylene inner
- Ties
50/bx, 6 bx/cs

**NON27385**
Hypoallergenic surgical mask
Cellulose inner and outer
- Ties

N95 Respirators

Fit instructions for N-95 particulate respirators

1. Place the respirator under your chin with the nosepiece pointing up.

2. Hold the respirator under your chin with the nosepiece up. Stretch the top strap over your head right above your ears. Stretch the bottom strap and position below your ears.

3. Conform the nosepiece to the shape of your nose, and adjust the headbands for comfortable fit.

4. Cup both hands over the mask, checking for tightness, and inhale sharply. Negative pressure should be felt in the mask.
