

TRIUMPH[®] CLASSIC

STERILE AND POWDER-FREE LATEX SURGICAL GLOVES

Despite being easy to don and low in price, research has uncovered numerous risks and complications associated with powdered gloves. Powder easily detaches from the surface of gloves, acting as a vehicle for bacteria and latex proteins. This contaminated powder can easily find its way to the patient.*

Triumph Classic is a latex, powder-free surgical glove. While many hospitals strive to implement powder-free environments in the Operating Room, for some, it puts too big a strain on their budget. Triumph Classic provides a cost-effective bridge to move from powder to powder-free surgical gloves.

Triumph Classic comes in half-fold packaging. This environmentally friendly option not only reduces waste but will also save storage space.

Features and Benefits

- Cost-effective alternative to using powdered gloves
- Ideal for general surgery
- New folded packaging design that reduces waste and saves space
- Powder-free and coated with a synthetic polymer to assist with damp hand donning
- ARC (anti-roll down cuff) was designed to reduce cuff roll-down common with most powder-free gloves
- Anatomical, curved former designed to enhance comfort and reduce hand fatigue

Specifications

- Natural Rubber Latex
- Synthetic Polymer Coating
- White
- Smooth
- Enhanced Sensitivity 8.7 mil

TECHNICAL SHEET

TRIUMPH CLASSIC

Primary Material	Low-Protein Powder-Free Natural Rubber Latex with Synthetic Polymer Coating ≤2.0 milligrams/glove of powder in accordance with ASTM D6124 and ISO 21171 Caution: This product contains natural rubber latex which may cause allergic reactions, including anaphylactic responses.
Donning Agent	Synthetic Polymer Coating (Inner surface coated for dry and damp hand donning)
Color	White (Provides contrast when using a dark colored underglove)
Grip	Smooth (Specially treated surface for a balanced grip with blood and other fluids)
Former (Mold) Design	Anatomical, curved former designed to enhance comfort and reduce hand fatigue
Cuff Design	Tapered, beaded cuff design to prevent rolldown
Chemical Additives (Accelerators)	Zinc Diethyldithiocarbamate (ZDEC) and Zinc Dibutyldithiocarbamate (ZDBC) Residual chemical levels below detectable level according to UPB/P/003a test method
Leachable Protein (per EN455-3 using ASTM D5712 (Modified Lowry Protein Method))	Low Protein: <50 micrograms/gram of total extractable protein Caution: Safe use of these gloves by or on latex-sensitized individuals has not been established.
Thickness (per ASTM D3577 ≥ 0.10 mm)	Finger Tip 0.22 mm Cuff 0.13 mm
Cuff Length (per EN455-2 ≥ 270 mm size 7.5)	290 mm
Force @ Break Before Accelerated Aging (per EN455-2 ≥ 9 N)	Meets/Exceeds
Force @ Break After Accelerated Aging (per EN455-2 ≥ 9 N, 7 days 70°C in an oven)	Meets/Exceeds
Elongation @ Break Before Accelerated Aging (per ASTM D3577 ≥ 750%)	Meets/Exceeds
Elongation @ Break After Accelerated Aging (per ASTM D3577 ≥ 560%, 7 days 70°C in an oven)	Meets/Exceeds
Freedom from Holes (per EN 455 AQL 1.5)	0.65 AQL Before Packaging 1.00 AQL Final Inspection
Viral Penetration	Tested and passed, in accordance with ASTM F 1671
Chemical Resistance	The resistance to some chemicals has been assessed in accordance with EN 374-3 Results and recommendations for use with chemicals can be obtained on request
Sterilization	Gamma Radiation, Sterility Assurance Level 10 ⁻⁶
Expiration Date	35 Months from Date of Manufacture Manufacture and Expiration Dates are printed on packaging (YYYY-MM format)
Packaging	Polyethylene peel pouch material protects product during transport and storage from moisture and ozone and prevents tearing when opening to maintain a sterile environment. Packaged in space-saving folded configuration.
Storage Recommendations	Protect from freezing. Avoid excessive heat. Keep dry. Product should be shielded from direct sunlight, fluorescent lighting, X-rays, moisture and ozone. Do not store in temperatures above 40°C.
Country of Origin	Malaysia
