METICULOUS CARE.

Central Sterile Capabilities
Comprehensive products, support and services
CARE STARTS HERE.

*Meticulous* describes the way central sterile departments everywhere approach their important work.

The reason is clear. Pathogens are tiny. They can hide anywhere. When the goal is to eliminate 99.999% of them, only a meticulous approach will do.

Most take for granted that the instrumentation that reaches the O.R. is sterile; however, few truly understand the detailed effort that goes into ensuring the sterility of the instrumentation.

Medline does understand. That’s why we take a meticulous approach to bring together the broadest line of essentials for every step of the central sterile process. You’ll see examples on the following pages.
DECONTAMINATION

Begin the process of 5 log contaminant reduction at the earliest stages with excellent chemical decontaminants, supporting tools and infrastructure.

Meritz® Plus disinfectant/decontaminant
Meritz Plus is safe, effective, no-mix general disinfectant spray or immersion soak. The phenol-free formula is bactericidal, fungicidal, virucidal and tuberculocidal.
EPA Reg. No. 1130-15-37549

Decontamination sink
A functional, triple-bowl design encourages AAMI-recommended practices and streamlines workflow. Large sinks let you completely immerse a surgical tray. Heavy-duty stainless construction means years of service. (not shown)

Bio-Zolve spray gel
Bio-Zolve presoak removes gross contaminants safely from instruments, as wetting agents keep surfaces moist for hours for easier processing.

Instrument lubricant
Reprocessing often removes the majority of instrument lubrication. Protect your investment and prolong the life of your instrumentation with Medline lubricant.
ASSEMBLY
Going from individual components to assembled sets is where central sterile transitions from preparing surgical tools to preparing for patient care.

Gem-Corner corner protectors
Disposable corner protectors create a strong barrier on trays to protect against tears in your sterilization wrap. They are compatible with steam, gas and low temperature plasma sterilization.

Gemini bonded wrap
Gemini SMS single-ply and bonded wrap help ensure the integrity of your sterilization process. Strong, low-linting and drapeable, it’s available in different weights and sizes to cover all your needs.

Steriset® sterilization containers
The Steriset containers’ exclusive thermal lock, valve plate and condensation drain system helps assure sterility. The aluminum case is strong yet lightweight and a versatile color-coding system simplifies case picking.
INSTRUMENTS

König® instruments from Medline offer German quality, endurance and precision that your practitioners will recognize and attractive pricing that your business management will appreciate.

Surgical instrumentation

The König line includes a variety of general and specialty instrumentation. König brand instruments are made from the finest German surgical grade stainless steel and backed by a limited lifetime warranty. Instruments may be purchased individually or in custom sets to meet any procedural need or surgeon preference.

Kerrison rongeurs

König instrumentation includes a broad spine portfolio. Kerrisons are available in a variety of styles with feature choices including foot plates, coatings, lengths, bite widths and more. The Open Up Single Piece Kerrison features a top runner that opens for easy and effective reprocessing.

Distraction pins

Precision made in the USA and available in both stainless steel and color-coded, heavy-duty titanium. Exceptionally sharp, self-tapping pins are available in multiple sizes and tips. The bullet end is a universal design to fit all drivers.
STERILITY ASSURANCE

In your highly scrutinized work, confidence in how you measure sterility is critical. Along with best practices, these products help assure you—and others—of a product’s sterility.

Advanced Bowie Dick steam sterilizer tests

Bowie Dick sterilization test cards provide accurate results, testing for both air leaks and wet steam content. The distinctive color change is easy-to-read and not reversible.

Steam integrator strips, class 5

Class 5 steam integrator strips measure the time, temperature and presence of steam in steam sterilizers. The irreversible color change indicates sterilization parameters are met.

STERILE STORAGE

Your storage area is where you bring order to chaos, where you respond to requests quickly and efficiently and where every inch matters.

High density sliding track system

To maximize storage in minimal space, combine shelving with a floor-mounted track system. Increase storage up to 150% by eliminating wasted space. Durable, industrial-strength bearings roll smoothly and support a 1500 lb. load.
Medline storage solutions

Your ultimate storage system starts with Medline. The incredible assortment of shelf components and accessories are easy to configure yourself or with help from our design staff. Engineered modularity means custom-built performance for an off-the-shelf cost.

Ultra hang and stack bins

These bins won’t rust, corrode, are waterproof, unaffected by weak acids and bases, and autoclavable. Designed to stack or hang from shelving securely, 19 sizes and 7 colors make the most organized storage system you can imagine.
One of the best ways to get started with Medline is picking some of your biggest challenges and seeing how we can address them together. Use this checklist as a guide.

**CHOICES START HERE.**

**Decontamination**
- **Cleaning Brushes**
  - Instrument Cleaning Brushes
  - Specialty Cleaning Brushes
- **Decontamination Sinks**
  - 3-Bowl System (multiple sizes)
- **Germicidal Disinfecting**
  - Glutaraldehyde High-Level Disinfectant
  - Meritz® Plus Disinfectant/Decontaminant
- **Instrument Cleaning**
  - Bio-Zolve Pre-soak Spray Gel
  - Enzymatic Detergent and Pre-soak
  - Enzymatic Tablets
  - Low-Suds Liquid Detergent
  - High-Suds Liquid Detergent
  - Super Concentrates
  - Instrument Lubricant
  - Alka-Wash
  - Alkaline Detergent
  - Cart-Washer Detergent
  - Rinse Aid
- **Stain and Adhesive Removers**
  - Stain Remover
  - Stain Away Instrument Wipes
  - Acid-Based Scale Remover

**Assembly**
- **Gemini Sterilization Wrap**
  - Light Weight Wrap
  - Regular Wrap
  - Medium Wrap
  - Heavyweight Wrap
  - Super Heavyweight Wrap
  - Gemini Bonded Wrap
  - Rigid Transport Tray for Wrapped Sets
  - Gem-Corner Protectors
  - Sterilization Wrap Rack
- **Identification Tape**
  - Identification Roll Tape
  - 0.25” Tape (0.6 cm) Wide
  - 0.13” Tape (0.3 cm) Wide
- **Instrument Guards**
  - Instrument Guards
  - Osteotome Guards
  - Retractor Guards
  - Duo Instrument Guards
  - Foam Instrument Protectors
- **Steriset® Sterilization Containers**
  - Steriset Full Size
  - Steriset Three-Quarter Size
  - Steriset Half Size
  - TASKIT® Container

**Sterilization Container Accessories**
- Sterilization Tray Liners
- Silicone Mats
- Container Basket ID Labels
- Process Indicator Cards
- Tamper-Evident Seals

**Sterilization Pouches**
- Self Seal Pouch
- Heat Seal Pouch
- Sterilization Tubing/Roll
- Tyvek® Pouch, Self Seal
- Tyvek Tubing
- Self Seal Dust Cover
- All Purpose Heat Sealer

**Sterilization Trays**
- Perforated Light Weight Aluminum Trays
- Wire Mesh Stainless Steel Trays
- Inner Trays for Steriset Containers
- Stacking Trays

**Tables**
- Assembly Table (H-brace or shelf)
Instruments

Surgical Instruments
- General Surgical Instruments
- Obstetrics and Gynecology
- Urology
- Cardiovascular and Thoracic

- Utility Carts

Tables
- Back table (H-brace or shelf)
- Instrument table (H-brace or shelf)

Wire Shelving
- High Density Shelving
- Partition Storage
- Wire Carts
SERVICE NEVER STOPS.

We value the central sterile function. More importantly, we value the people in SPDs: their time, their budgets and their challenges. Medline services help SPD departments achieve their mission-critical objectives by simplifying ordering, delivery, storage and more.

Simple ordering with Medline.com
The user-friendly customer order portal on medline.com is straightforward and accurate. It’s designed to help you spend less time ordering supplies and more time managing your department. When you consider that one Medline order can cover what you may have needed three or four other vendors to provide, your time savings really add up.

Medline University®
Our customers use our free, 24/7 educational resources to learn about central sterile, the operating room and more. You can even build curriculums, track who’s taken what course and create reports for management.
Reliable, dependable logistics
As specialists in getting the right product to the right place at the right time, we set high standards for our order accuracy and timeliness. We use our own distribution centers, our own employees and often our own truck fleet along the way. It’s us you’re dealing with, not some third-party.

Space planning and redesign
How do you get increased storage, better organization and improved workflow from the same amount of space? A Medline storage solution project is the answer. We will design an ultra-efficient storage system from the walls out, provide CAD drawings and even manage installation. Ask about case studies where facilities like yours have accomplished these objectives and more.

Your Medline Rep
Your dedicated representative is always a phone call or email away, backed up by a full support organization of clinicians, regulatory experts, product specialists and more. Every one is action-oriented and dedicated to meeting your expectations.
