Cube Track System
Enhance Cubicle Curtain Cleanliness

Monitor Cubicle Curtains Throughout Your Facility
In a recent study, swab cultures revealed just how filthy hospital cubicle curtains can be.1 With Cube Track, you can better track the usage and cleanliness of cubicle curtains throughout your facility with cutting-edge technology, including a scanning device, innovative software program and cloud-based servers.

Exclusively from Medline.
Increase Efficiency
- Quickly access histories and other useful information about your curtains – not just data
- Identify potential issues before they become problems
- Increase bed availability by eliminating unnecessary curtain changes

Improve Patient Satisfaction
- Minimize patient disruption while taking inventory of curtains
- Improve the cleanliness of your facility
- Show your patients – and your community – that you are employing advanced methods to maximize cleanliness

Enjoy Easy Implementation
Implementation is a snap, and your Medline representative will be there to help every step of the way. A staff member can be fully trained to use this program in just minutes.
- State of the art RFID Chip
- Smallest, washable tags, flexible and ideal for flat linens
- Tag can be sewn in to be as discreet as possible

To learn more about Cube Track, contact your Medline representative about setting up a webinar in your facility.
