STREAMLINE YOUR SPD.

Sterilization Inventory Management
Optimal efficiency for sterility assurance.
Transform your SPD into an instrument of efficiency.

Behind the scenes, you’re under constant pressure to meet the critical standards of sterilization. It’s vital to patient safety—and there’s no room for error.

The smallest tear in sterilization wrap can result in serious risks, including surgical site infections. That’s why an efficient, well-organized sterile processing department (SPD) is crucial. So you can ensure sterilization without a doubt.

We can help streamline your SPD with an all-in-one solution that merges packaging protection with logistical management for optimal safety and efficiency.

---

300,000 Surgical site infections affect as many as 300,000 patients per year in the U.S.¹

31% SSIs account for 31 percent of all hospital-acquired infections.²

$4 billion Cost of SSIs ranges between $10,443 and $25,546 for each occurrence, or more than $4 billion annually.²
Small problems, serious consequences.

Space constraints and a poor storage setup can lead to:

» Compromises in sterilization wrap, posing a risk to patient safety
» Stacking heavy trays, a violation of AAMI best practices
» Disorganized storage, which wastes valuable time and increases the likelihood that sets are dragged on wire rack shelving

Take safety and efficiency to the next level.

Our inventory management solutions:

» Improve organization
» Save valuable storage space
» Reduce reprocessing costs by protecting against tears and holes from stacking trays
» Reduce operating costs by eliminating inefficiencies
» Pull-out shelving helps prevent holes on the bottom of wrap from dragging across shelving

“When we expanded and updated our Materials and Sterile Processing departments, we considered various options for storage, workstations, and movable carts. The result is a well-organized, efficient storage system that is configurable to our constantly changing requirements.”

Laurie H. Riley, Perioperative Supply Chain Manager
University of Rochester Strong Memorial Hospital—Rochester, New York
Create an efficient SPD—seamlessly—with our custom storage solutions.

You’re tasked with optimizing floor space, managing inventory and containing costs. We make it easy with custom storage solutions that organize your SPD from the ground up.

**Plan**

We conduct a thorough assessment to identify your unique needs, focusing on the following areas:

**Consultation**
- Inventory management
- Cost reductions
- Optimizing floor space
- Retrieval times
- Labor efficiencies
- Compliance

**Site Survey**
- Identify PAR levels
- Measure existing space and inventory
- Understand future expansion
3D Design
We’re the only company on the market to provide an innovative 3D design rendering of your storage area. This offers a real-life look at your plan before it’s put into action.

Design Considerations
» Engineer system based on your inventory
» Design room flow
» Consider ergonomics
» Collaborate with architects and planners
» Design CAD drawings
» Plan for future expansion

Proposal Points
» Our findings
» Current problem
» Our solution
» Future benefits
» Financial analysis

Implementation
We implement your new system seamlessly, so your SPD continues to run smoothly with minimal disruption.

Execution
» Installation and assembly
» Design interiors and compartments
» Inventory transfer
» Labeling
» Continued onsite support

Results
» Inventory reduction
» Ability to focus on patient care
» Maximized space
» Helps improve safe work conditions
» Promotes increased productivity
Protect against tears with essential products.

It all comes down to organization. Get your SPD in order with our industry-leading selection of shelf covers, liners and wrap racks. Everything is securely in its place, and confidently protected.

**Snap-On Shelf Covers**
- Easy to attach to shelves
- Helps create a healthier environment and clean, solid surface
- Constructed of polyethylene for added strength and durability
- Raised embossed design promotes air circulation

**Inlay Mats**
- An economic solution for converting a wire shelf into a solid surface
- Mats prevent stored items from falling through the shelf
- Easy to install and easy to remove for cleaning
- For use with wire shelving units

Customize our case carts, your way.

Our surgical case carts can be completely customized to meet your facility’s needs and preferences.
Corner Protectors
» Helps protect instrument tray corners from holes and tears
» Helps reduce stress on critical areas
» Disposable and reusable options
